

SHEHAB SABER ABDALLAH

FLUTTER DEVELOPER

Assiut, Egypt • +20 111 650 1265 • shehab.saber.dev@gmail.com • linkedin.com/in/shehab-saber-a78746355 • github.com/shehabs-dev • shehabs-dev.github.io/portfolio

PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of hands-on experience building cross-platform mobile applications using Clean Architecture, BLoC, and Firebase. Skilled in offline-first data persistence (Hive, SQLite), REST API integration, and on-device AI inference, with a track record of owning mobile codebases end-to-end as a solo developer.

TECHNICAL SKILLS

Mobile	Flutter, Dart, Responsive UI, Offline-first Applications, GoRouter
Architecture	Clean Architecture, SOLID Principles, Repository Pattern, Feature-Based Architecture, Dependency Injection (GetIt)
State Management	BLoC (flutter_bloc)
Backend & Cloud	Firebase Authentication, Cloud Firestore, Cloud Messaging (FCM), Cloudinary, REST API Integration
Local Storage	Hive, SQLite, SharedPreferences
Tools	Git, GitHub, Postman
Release & CI/CD	GitHub Actions (CI/CD), Shorebird (OTA Code Push)

PROFESSIONAL EXPERIENCE

PlantDoctor (Graduation Project) — Lead & Sole Flutter Developer October 2025 – July 2026

Flutter · Firebase · Cloudinary · TensorFlow Lite · Hive · BLoC

- Owned the complete mobile codebase as sole developer on an 11-member cross-functional team, architecting 7 modular features with Clean Architecture and BLoC.
- Removed the network dependency for diagnosis entirely by integrating on-device TensorFlow Lite inference, enabling real-time plant diagnosis fully offline.
- Built an offline-first data layer with Hive, syncing automatically to 6 Cloud Firestore collections once connectivity returns.
- Streamlined internal testing by wiring Shorebird for OTA code pushes and routing media through Cloudinary REST endpoints.

Flutter Clean Architecture Posts — FlutterDeveloper February 2026

Flutter · BLoC · GetIt · REST API · SharedPreferences

- Structured the codebase around Clean Architecture (data, domain, presentation layers) and the Repository Pattern to keep the app scalable and testable.
- Drove CRUD operations and UI state through BLoC/Cubit for predictable, easy-to-test data flow.
- Added a SharedPreferences caching layer so the app falls back gracefully to local data during network disruptions.

Flutter Notes — Flutter Developer July 2025 – October 2025

Flutter · SQLite · Flutter Quill · GoRouter · Localization

- Built a rich-text editor with formatting, favorites, and GoRouter-based navigation for fast, intuitive note-taking.
- Persisted notes locally with SQLite for instant-load performance and added multi-language localization to reach a global audience.
- Designed responsive layouts with custom theme switching and dynamic font scaling to support accessibility.
