PROFESSIONAL SUMMARY

Flutter Developer with 1.5+ years of experience building scalable, maintainable, and production-ready cross-platform applications. Skilled in Clean Architecture, BLoC, Firebase, and offline-first application design, with a strong focus on maintainable software architecture and engineering best practices.

Led an 11-member graduation project as Team Leader and sole Flutter developer, building the mobile application while collaborating with backend, AI (RAG), and dashboard teams to deliver a production-oriented agricultural disease diagnosis system. Currently expanding into backend development with Python to build secure REST APIs and contribute across the full application stack.

TECHNICAL SKILLS

Languages Dart, Python, SQL, HTML, CSS

Mobile Flutter, Responsive UI, Cross-Platform Development

Architecture Clean Architecture, SOLID Principles, Repository Pattern, Feature-Based Architecture, Dependency Injection (Getit)

State Management BLoC (flutter_bloc)

Backend & Cloud Firebase Authentication, Cloud Firestore, Cloudinary, REST API Integration

Local Storage Hive, Sqflite, SharedPreferences

AI & Data (Foundational) TensorFlow Lite Integration, Pandas, NumPy, scikit-learn, Streamlit

Tools Git, GitHub, Android Studio, VS Code, Jupyter Notebook

FEATURED PROJECTS

PlantDoctor

Team Leader & Sole Flutter Developer

Flutter · Firebase · TensorFlow Lite · Hive · BLoC · Clean Architecture

Production-oriented graduation project comprising a Flutter mobile application, backend services, AI (RAG), and an administrative dashboard.

- Led the 11-member team, distributing tasks and guiding members across every project workflow.
- Designed and built the complete Flutter application using Clean Architecture and BLoC.
- Integrated Firebase Authentication, Cloud Firestore, Cloudinary, and backend REST APIs.
- Implemented offline-first data persistence with automatic synchronization and on-device TensorFlow Lite inference.
- Collaborated with backend and AI teams to integrate REST APIs and RAG-powered recommendations.
- Built reusable, responsive UI components with robust error handling and maintainable architecture.

→ [Repository](#)

Car Price Prediction

Python · Pandas · scikit-learn · Streamlit

- Built a machine learning application covering data preprocessing, feature engineering, regression modeling, evaluation, and interactive prediction.
- Evaluated model performance using R^2 , RMSE, and MAE.

Additional Flutter Projects

- **Flutter Notes** — Clean Architecture, BLoC, SQLite, Flutter Quill, localization. [Repository](#)
- **MyMap** — Live location tracking, OpenStreetMap, Geoapify search, interactive maps. [Repository](#)
- **Flutter Clean Architecture Posts** — Clean Architecture implementation with Repository Pattern, HTTP, SharedPreferences, and FPDart. [Repository](#)

EDUCATION

Bachelor's Degree in Public Policy & Information Systems (PPIS)

Faculty of Commerce, Assiut University • Graduated: 2026 • Overall Grade: B+

LANGUAGES

Arabic — Native • **English** — B2 (Upper-Intermediate)
