PROFESSIONAL SUMMARY

Flutter Developer with 1.5+ years of experience designing and building cross-platform mobile applications using Clean Architecture, BLoC, and Firebase. Focused on writing maintainable code and structuring applications for long-term scalability rather than short-term delivery.

Led an 11-member graduation project as Team Leader and sole Flutter developer, distributing tasks and guiding members across mobile, backend, AI, and dashboard workstreams to deliver a production-oriented agricultural diagnosis application. Continues to build independent Flutter projects covering REST API integration, offline-first data handling, and custom UI work.

TECHNICAL SKILLS

Languages Dart

Mobile Flutter, Responsive UI, Offline-first Applications, GoRouter

Architecture Clean Architecture, SOLID Principles, Repository Pattern, Feature-Based Architecture, Dependency Injection (GetIt)

State Management BLoC (flutter_bloc)

Backend & Cloud Firebase Authentication, Cloud Firestore, Cloudinary, REST API Integration

Local Storage Hive, Sqflite, SharedPreferences

Tools Git, GitHub, Android Studio, VS Code

Release & CI/CD GitHub Actions (CI/CD), Shorebird (OTA Code Push)

FEATURED PROJECTS

PlantDoctor

Team Leader & Sole Flutter Developer

Flutter • Firebase • Cloudinary • TensorFlow Lite • Hive • BLoC

Production-oriented graduation project comprising a Flutter mobile application, backend services, AI (RAG), and an administrative dashboard.

- Led the 11-member team, distributing tasks and guiding members across every project workstream.
- Architected the Flutter application across 7 modular features using Clean Architecture and BLoC.
- Integrated Firebase Authentication, 6 Firestore collections, Cloudinary, and 2 REST endpoints for RAG recommendations.
- Implemented offline-first data persistence with automatic synchronization and on-device TensorFlow Lite inference.
- Validated core workflows through internal testing with the 6-member graduation team before final delivery.
- Built reusable, responsive UI components and used Shorebird to push updates directly to testers.

Flutter Clean Architecture Posts

Flutter • BLoC • GetIt • REST API • SharedPreferences

- Implemented full CRUD flows against a REST API, with clear success and error feedback in the UI.
- Built a repository abstraction with remote and local data sources, enabling automatic offline fallback.
- Structured the codebase into presentation, domain, and data layers with dependency injection for easy testing.

Flutter Notes

Flutter • SQLite • Flutter Quill • GoRouter • Localization

- Built a rich text note editor with formatting, favorites, and local search for quick access to saved entries.
- Persisted notes locally with SQLite and added theme, language, and font-scaling customization with localization support.
